

Random Number Generator Certificate

Operator: Skill on Net

URL:www.EuroMania.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) from Skill on Net and found that the RNG complies with the relevant standards.*

The RNG uses a widely recognized algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated shuffling for 1 deck (without jokers and with 1 joker), 6 decks and 8 decks of cards. iTech Labs has also conducted scaling tests for the number ranges used in the non card games. The shuffling and scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the dice/card/number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

Signed:

A handwritten signature in black ink, appearing to read "G. Y. Nicoll".

Geoff Nicoll
Principal Consultant
iTech Labs Australia

Date: March 3, 2009

* Notes: The RNG was tested according to Alderney Gambling Control Commission (AGCC), UK Gambling Commission, Isle of Man and Malta standards.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
